

S. MOHAMMED SALMAN

AI & Data Science Engineer | Machine Learning • Data Analytics • Full-Stack AI Systems • NLP

Coimbatore, Tamil Nadu, India | +91 9092091569 | smohammedsalman332@gmail.com

LinkedIn: [linkedin.com/in/s-mohammed-salman](https://www.linkedin.com/in/s-mohammed-salman) | GitHub: github.com/Salman330

PROFESSIONAL SUMMARY

- AI & Data Science undergraduate (7th semester, RVS Technical Campus, Anna University) with hands-on experience building production-grade ML systems, full-stack AI applications, and BI dashboards.
- Independently engineered the AI-Powered Resume Analyzer & ATS Platform, a full-stack multi-tenant system with hybrid BERT-based scoring, role-based access, and an AI career toolkit.
- Delivered a hybrid movie recommendation engine (collaborative filtering + TF-IDF) and a house-price regression project; automated Power BI reporting at Gateway Software Solutions.

TECHNICAL SKILLS

Languages:	Python, SQL
ML / Data Science:	Scikit-learn, Pandas, NumPy, Collaborative Filtering, TF-IDF, Cosine Similarity, Sentence-BERT, Advanced Regression, Feature Engineering, Model Evaluation, Deep Learning Fundamentals
NLP:	Sentence-BERT Semantic Similarity, TF-IDF Vectorization, Text Preprocessing, NLTK, NLP Fundamentals
Full-Stack:	Streamlit, Flask, SQLite, SQLAlchemy, RESTful Design, Role-Based Access Control, Local LLM Integration (Ollama)
Visualization & BI:	Power BI, Tableau, Matplotlib, Microsoft Excel
Cloud / Dev Tools:	Google Colab, Jupyter Notebook, Git, VS Code, MySQL
Core Concepts:	EDA, Data Cleaning, Recommendation Systems, Statistics, Supervised Learning, Generative AI Fundamentals

ACADEMIC & PERSONAL PROJECTS

AI-Powered Resume Analyzer & ATS Platform

Python, Streamlit, Sentence-BERT, SQLite, SQLAlchemy, Ollama, NLTK | github.com/Salman330

- Built a full-stack, multi-tenant ATS with role-based login for recruiters, candidates, and administrators, evolving a resume-screening prototype into a complete hiring platform.
- Designed a hybrid scoring engine: Sentence-BERT semantic similarity (40%), a 9-category/110-skill taxonomy (35%), experience extraction (15%), education matching (10%), with calibrated rescaling for realistic 0-100 scores.
- Developed an AI career toolkit (resume feedback, skill-gap analysis, interview prep) powered by a locally hosted Ollama LLM for zero-cost, offline-capable inference.
- Implemented a job board, recruiter Kanban pipeline, audit trail, bulk screening for up to 300 resumes, and automated notifications; consolidated ~30 files into 8 modules (~2,400 lines) with a 59-check test suite (100% pass rate).

AI Hybrid Movie Recommendation System

Python, Scikit-learn, Pandas, TF-IDF, Cosine Similarity, Collaborative Filtering | [Personal Project](#)

- Architected a hybrid recommendation engine fusing collaborative filtering with TF-IDF + cosine similarity for personalized movie suggestions.
- Engineered real-time preference adaptation, re-ranking recommendations dynamically as user behavior changes; validated quality using precision@k and recall@k.

House Prices - Advanced Regression Techniques

Python, Google Colab, Power BI, MySQL | [Tech Vedhu](#) | Jul-Sep 2025

- Built an end-to-end regression pipeline predicting residential property prices using feature engineering, regularization, and ensemble methods; performed EDA and data cleaning.
- Visualized key price drivers using Power BI and Matplotlib; managed data with MySQL and Google Colab.

INTERNSHIP EXPERIENCE

Data Analyst Intern — Sri Lakshmi Technology | 15-Day Project-Based Internship | Coimbatore | 2026

- Designed and built an AI-Powered Resume Screening System, evolving it from a TF-IDF/cosine-similarity prototype into a full recruiter and candidate portal.

- Engineered a hybrid resume-scoring engine combining BERT semantic similarity (all-MiniLM-L6-v2, 40%), rule-based skill matching (35%), education relevance (15%), and experience matching (10%).
- Built a Kanban pipeline board, audit trail, job postings, and company verification workflow; implemented bulk screening for up to 300 resumes, validated by a 59-check test suite (100% pass rate).
- Resolved 7 confirmed scoring bugs and fixed a scoring-calibration issue via a rescaling function mapping raw similarity to a realistic 0-100 range.

Data Science Intern — Gateway Software Solutions | Coimbatore, Tamil Nadu

- Cleaned, transformed, and validated 10+ structured datasets, standardizing schema across reporting pipelines to improve data consistency.
- Conducted EDA using Pandas and Matplotlib to uncover business trends informing weekly stakeholder reports; built interactive Power BI dashboards adopted by the reporting team.
- Automated data-preparation workflows with Python, accelerating the analytics cycle; attended a Generative AI webinar (HPE, Mar 2026).

EDUCATION

B.Tech, Artificial Intelligence & Data Science RVS Technical Campus, Coimbatore (Anna University)	CGPA: 7.9/10 2023 - 2027
Higher Secondary Certificate (HSC) St. Thomas Higher Secondary School, Coimbatore	59% 2023

CERTIFICATIONS & ACHIEVEMENTS

- Internship Completion Certificate, Data Analyst Domain — Sri Lakshmi Technology (Jul 2026) | Data Science with Python — Tech Vedhu (2024-2025)
- Power BI for Data Analysis — Simplilearn (2024) | Python for Data Science — LinkedIn Learning (2024)
- Responsible AI (2024) | Generative AI Webinar — Gateway Software Solutions, Delivery Partner HPE (Mar 2026)
- Participated in International Level Hackathon 360°-3.0, organized by KPR Institute of Engineering & Technology and ECLearnix EdTech (Feb 2026)
- Cleared the ICAT (Internship Common Aptitude Test) — May 2026, Certificate No. CIT-P-3313380
- Tech Vedhu Data Science Badge — ML, NLP, Deep Learning, Power BI, SQL, Tableau, Python (Jul 2025) | Active GitHub contributor (github.com/Salman33o)
